

NEW YORK, NY, AUGUST 1, 2024

Experts' Choice Awards 2024: The World's Best Hotels, Restaurants & Attractions

The only accolade based on professional reviews

Tripexpert announced today the winners its eighth annual [Experts' Choice Awards](#). There are 7,900 winners in 118 countries, the most recipients ever (up by 15% since last year) across three categories: hotels, restaurants and tourist attractions.

Experts' Choice recognizes the world's best travel businesses. It's the only industry accolade based on professional reviews from travel guides, magazines, newspapers, and other respected sources. Unlike user reviews, which are subject to abuse and bias, Tripexpert gathers only content written by people who have travelled extensively in the country that they're covering and who can provide reliable and unbiased advice.

In the last 12 months, the Tripexpert team has focused on adding reviews from new publications and for venues in new destinations. About 120,000 reviews have been added; many are extracts from long-form articles published in major newspapers and travel guides.

"Tools of modern technology like artificial intelligence are helping travelers research trips, plan itineraries, and more. But these tools rely on a bedrock of high-quality data. Our focus for over 10 years at Tripexpert has been to surface the most accurate and helpful travel review data," said Chris Blume, Chief Content Officer. "The best travel advice continues to be written by people who know what they're talking about and who are passionate about their recommendations. We're delighted to announce this year's winners of our Experts' Choice Awards."
